2S Global
A 2S Consulting company

OUR VALUE
AT A GLANCE

Headquartered in Switzerland, a global deep-tech hub, 2S Global brings the next-gen automation, machine learning, AI, and analytics solutions.

2S Global Switzerland partners with private and public organizations to drive measurable performance improvement by combining proprietary AI diagnostics and strategy maps with advanced AI-enabled transformation.

Our ProcessPrints create a transparent, data-driven view of end-to-end operations—revealing utilization gaps, bottlenecks, control weaknesses, and value-leakage opportunities. Building on this fact base, we deploy targeted AI use cases such as intelligent document processing, automated workflows, predictive forecasting, anomaly detection, resource and working capital optimization, and business copilots—ensuring tangible ROI rather than experimentation.

Backed by deep strategy and management consulting expertise and strong AI/technology capabilities from Switzerland, Finland, and the US, we bridge board-level strategy with hands-on implementation, enabling leaders to modernize organizations with speed, rigor, and sustainable impact.

Table Of Contents

Context For Change. 5

- Key drivers industry and value focus
- Key implications and IT/Finance agenda

2S Offerings. 9

- 2S Cognitive Operations
- Process and AI expertise
- NextGen Data Platform with AI impact

Why 2S? 15

- Why clients choose us
- Aligned for success

OUR TEAM

ANAND, US *Americas Head*

- Leads global delivery team
- 2 decades of experience in managing delivery of large and complex LifeSciences process optimization, SCM and AI-ML and data engineering projects
- Ex- Deloitte Consulting, US
- B. Tech, IIT Kanpur, India

RAJEEV, Switzerland *EMEA Head*

- Expert in designing and driving data-led transformations to turn data into a strategic and revenue-creating asset
- Ex- Deloitte Consulting, US – Expert in Data & Analytics/ F&PM services
- 20 years experience in helping clients build digital strategy and operationalize it through concrete portfolio of data-led capabilities
- B. Tech, IIT Mumbai, India
- Fluent in English, German

DR. NITIN , Switzerland *Head AI-ML*

- Expert in AI-ML technologies
- 15+ years of experience in data science and advanced analytics
- Applied AI-ML to more than 200+ use cases across industries
- B. Tech, IIT Mumbai; PhD University of Zurich, Switzerland

THEO, Netherlands *Data Science Lead*

- Expert in data science and AI-ML based technologies
- Special expertise in application of advanced analytics to the LifeSciences and healthcare context
- Fluent in German, Dutch, English

CYNTHIA, Netherlands *Operations Expert*

- Strong operations management background with focus in Lifesciences operations management and decision making
- Ph.D., Operations Management
- Fluent in Dutch, English, Mandarin

THOMAS, Switzerland *Lifesciences & Healthcare Expert*

- Deep knowledge of pharma and healthcare operations in Europe
- Expertise across process design and blueprint, technology enablement, digital roadmap.
- Universities of St. Gallen (HSG); Fluent in German, English and French.

CHANGING PHARMA/ MEDICAL DEVICES ECOSYSTEM

THE MACRO-FORCES SHAPING PHARMA & MEDICAL DEVICES INDUSTRY STRUCTURE ARE ACCELERATING THE NEED FOR DIGITAL

The Lifesciences and Medical Devices industry is being reshaped by aging populations, chronic diseases, patent cliff, increasing drug discovery costs, device commoditization and the pursuit of AI in medicine. These macro- forces are accelerating the need for next-decade ERP/CRM capabilities along with integration of data with a singular enterprise data platform. Digital technologies enable efficient commercial operations, lean and responsive supply chain, cost-effective operations, and AI-driven impact.

01 *TILTING VALUE EQUATION*

- Difficult, longer and more expensive drug discovery paths
- Supply chain and distribution challenges (e.g. temperature sensitive products, competition from international pharma)

02 *CHANGES IN EXPECTATIONS WITH AI-ML*

- Increased expectations from the disruptive power of AI
- Higher expectations across providers, patients and payors
- Growing need for patient engagement and experience management

03 *REGULATORY PRESSURE*

- Complex compliance requirements for varying regulatory frameworks (EMA, changing member state requirements)
- Economic pressure on healthcare and stringent price controls
- Initiatives on safety and quality

KEY IMPLICATIONS AND ACTION AGENDA

01 *DIGITAL TRANSFORMATION TO UPGRADE AND ALIGN OPERATIONS*

- Identify new capabilities model and determine required maturity
- Develop AI-enabled roadmap to implement enabling capabilities

02 *SOLUTION-CENTRICITY AS A CORNERSTONE FOR PORTFOLIO REMODELING*

- Identify factbase on data assets and determine potential value to ecosystem and patients
- Create offerings based on data assets and scale up as per market feedback
- Explore benchmarking services based on proprietary data pools

03 *IMPROVED PATIENT VALUE BY USING DATA ASSETS*

- Identify data capture opportunities across patient pathways
- Identify use-cases to guide marketing and sales activities (e.g. portfolio based sales approach, marketing automation, etc.)
- Coordinate data and actions across different teams (e.g. sales/ service)

2S Healthcare has developed AI-ML-driven solutions for digital transformation in healthcare since 2017

CUSTOMERS

OUR POWERFULLY SIMPLE SOLUTIONS ARE BASED ON FOUR PILLARS

TURNKEY SET-UP

Provide affordable access to state-of-the-art technologies and infrastructure

MANAGE

Manage non-clinical operations so you can focus on patient care

DEVELOP

Accelerate patient access to care develop services and enhance reputation

OPTIMISE

Deliver best-in-class cost efficiency and patient outcomes

HCARE360

Spend Optimization

Drive cost efficiencies from your procurement through powerful AI/ML models

Performance Optimization

Increase operational efficiency in cardiovascular care settings

Service Development

Enable volume and appropriate revenue growth

Managed Services

Share accountability and management to deliver enhanced results

Key shift from commoditized individual devices to differentiated comprehensive Solutions.

Data-led insights key to understanding customer operations, identifying objective improvement opportunities and establishing proprietary factbase

OUR OFFERING

2S “COGNITIVE OPERATIONS” OFFERINGS

2S has leverage it’s deep experience of 20 years in strategic operations, 100% first-time-right data capabilities and Swiss deep-tech expertise to create high impact precision offerings with high octane delivery for highly regulated environments. We deploy the below principles into our approach.

01	Agentic AI based hyperautomation for future-proof workflows
02	Creating bespoke AI-driven capabilities using data lake to reduce overall TCO
03	Assorted approach from “Fit-for-purpose” to “Competitively distinctive”

HYPERAUTOMATION

Touchless Financial Reconciliation: End-to-end AI bots for intercompany, bank, and ledger reconciliation to eliminate month-end bottlenecks.
Predictive Resource & Planning: AI models for demand forecasting, specifically tailored for R&D and clinical trial staffing cycles.
Cognitive P2P/O2C: Intelligent processing of complex medical billing and vendor invoices, clinical development cycles, HEOR, etc and ensuring GxP compliance.

AUGMENTED PERFORMANCE INTELLIGENCE

Smart Planning & Budgeting: Moving beyond Excel with machine learning models that predict population health, volatility and supply chain shocks in the sector.
On-Demand Executive Reporting: Voice/Text-activated "Reporting Bots" that generate instant, boardroom-ready insights from enterprise data sets.
Patient & Market Analytics: Financial impact modeling of product launches and patent expirations using real-world evidence data.

AI TRUST, RISK AND GOVERNANCE

AI Roadmap & Strategic Guardrails: Defining the "North Star" for AI adoption while ensuring compliance with Swiss and EU AI Acts.
Life-Science Data Governance: Frameworks designed for the high-security needs of Pharma/ Healthcare, ensuring data integrity across R&D and Finance.
Algorithmic Audit & Transparency: Specialized tools to explain AI decision-making in forecasting and automation to internal and external stakeholders.

LEAN DIGITAL ESTATE AND IT OPTIMIZATION

IT Portfolio Rationalization: Identifying redundant legacy systems in post-merger environments to streamline the IT landscape.
TCO Reduction & ROI Monitoring: Rigorous tracking of IT asset performance to ensure every Swiss Franc spent on tech translates into financial capability.
Lean IT for MedTech: Optimizing the IT footprint to support "Software as a Medical Device" (SaMD) initiatives without bloating the cost base.

2S is your ”reliable AI partner” to bring ”guaranteed financial impact”

YOUR PARTNER

ELITE TALENT DENSITY ACROSS PREMIUM CONSULTING AND ACADEMIA

MEDTECH PRECISION

Deep understanding of financial nuances at Medical Device leaders

SWISS RELIABILITY

Zurich-based hub that understands DACH and Data regulations

DOMAIN EXPERTISE

Proven track record with industry titans and marquis clients

DATA DEPTH

15+ years of getting data “Right-the-first-time”

Our Evolution

Excellence for Planning, & Perf. Mgt

Best-in-class capabilities on how to plan and manage business with integrated planning and performance management

Digital Solutions and Data Governance

Establish data custodian model and data quality certification to ensure consistent use of data by the data consumers

AI at Scale

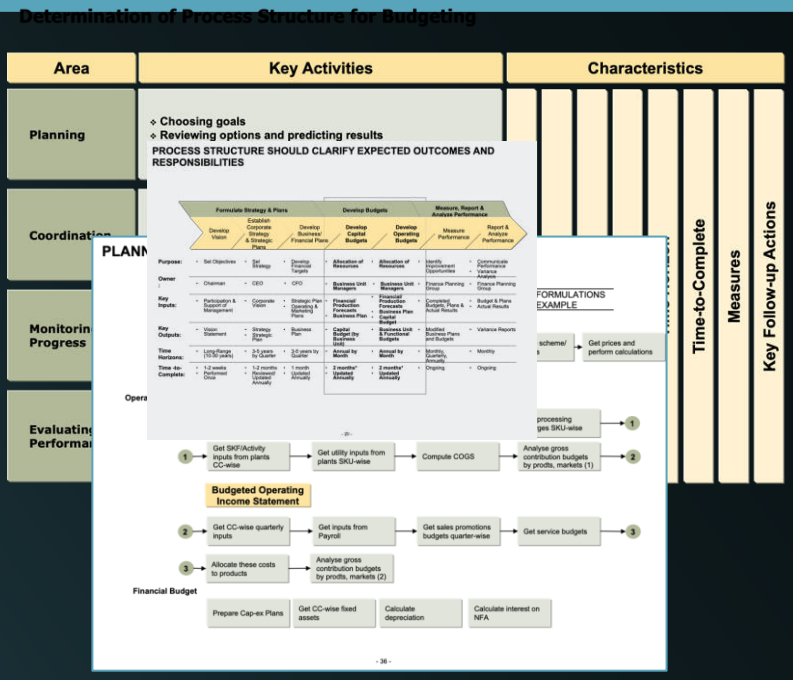

Targeted and precise add-ons for Accounting reconciliation, Consolidation, Reporting and Cash Flow Management capabilities with next-gen multi-agentic models

Leaner, standardized and simplified IT & data portfolios with reduced TCO and measurable business impact

AI solutions and agentic workflows to ensure finance as in-house AI lead adopter and governor

AI EXPERTISE
AT A GLANCE

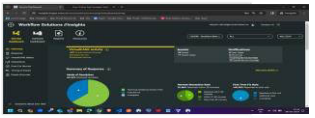

Case example: Digital solutions in Radiology – Injector insights

Context

- Our client offers contrast media, auto injectors and software solutions for CT & MRI
- The auto injectors collect large amounts of procedure related data and have remote connectivity via secure link
- Our client was keen to offer value-added solutions to its customers and differentiate from competitors

Outcome

- Client has successfully launched performance benchmarking for customers in US and EU
- Predictive maintenance offered for selected customers

Our Solution

- We developed a strategy for client to create and monetize value added solutions
- We
- We

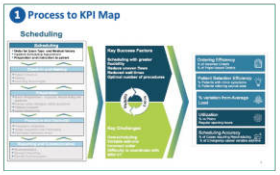

Case example: Digital solutions in Radiology – Pathway optimization

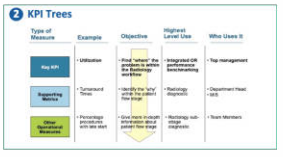

Context

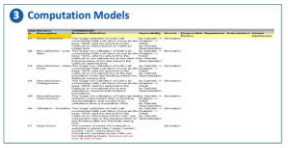

- Our client offers contrast media, auto injectors and software solutions for CT & MRI
- Client had embarked on a multi-year transformation from selling products to solutions, and had a roadmap of solutions starting with operational benchmarking and efficiency solution
- Client wanted to build a scalable and user friendly solution that is also easy to deploy

Our Solution

- We supported the client to develop a process map, KPI's and a operational benchmarking model
- We leveraged HCare360 platform to build the benchmarking database and an user friendly fully customizable dashboard. Cloud deployment and AI based data validation made it easy to scale
- We supported client team to roll out the solution globally and build a consulting offering around it

HCare360 data platform
ISO 27001, 27017, 27018 certified
R&D in Finland

AI FOR IMPACT

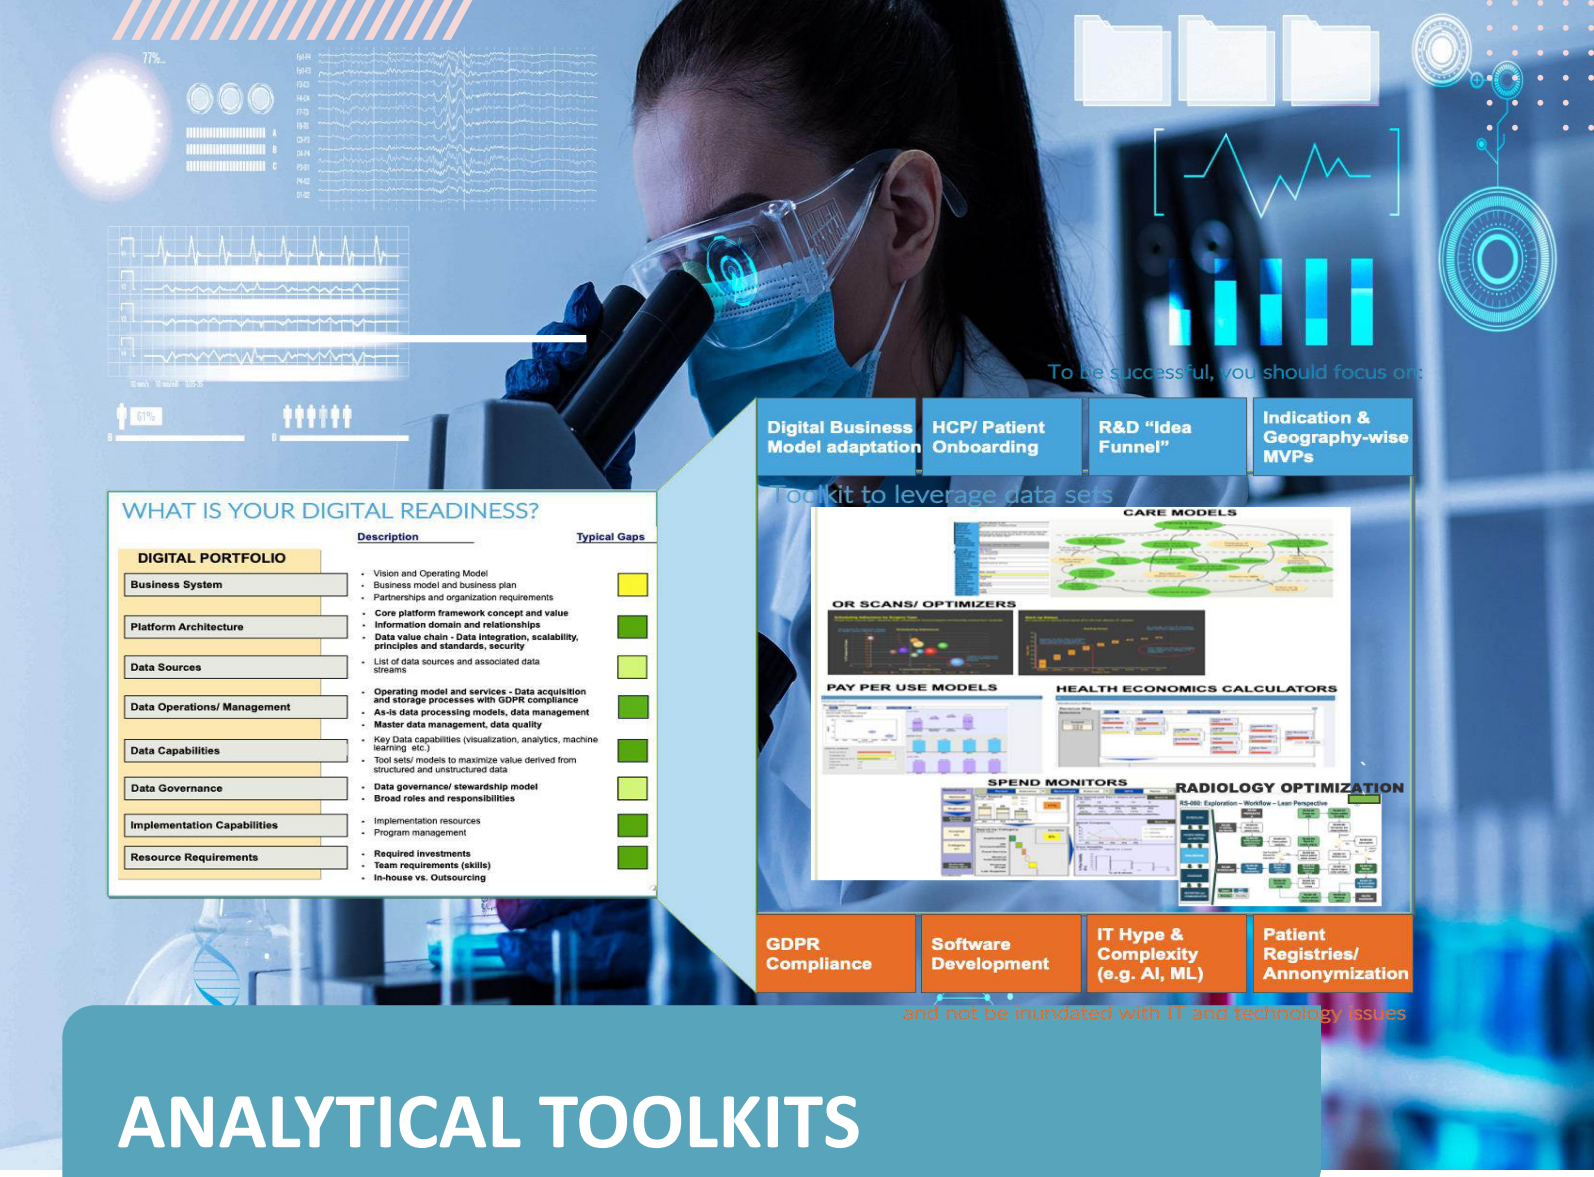

2S optimizes operational frameworks, enhancing workflows and resource utilization for seamless value performance and enhanced user and customer experiences.

01 *OPERATIONAL EFFICIENCIES*

Boosting productivity through streamlined processes and workflows, 2S enhances operational efficiency with technology and AI-driven solutions for maximum impact.

02 *COST MANAGEMENT*

2S ensures financial health by strategic cost control, offering innovative solutions that maintain quality and foster growth for businesses.

ANALYTICAL TOOLKITS

01 *TARGETED NEXT-GEN BESPOKE APPLICATIONS*

Next Gen Transactional Engine: Numantra Technologies revolutionizes transactions with a cloud- based, best-in-breed hybrid engine, ensuring seamless, future-ready digital interactions that enhance efficiency and customer/ patient satisfaction.

02 *DATA PLATFORM*

Numantra's robust data platform transforms raw information into actionable insights, empowering management to make informed decisions and drive strategic growth.

02 *AL-ML BASED ANALYTICS*

Leveraging Al and machine learning, Numantra's analytics solutions unravel deep patterns within data, enabling businesses to gain predictive insights and stay ahead in a dynamic market landscape.

WHY CLIENTS CHOOSE US?

INDUSTRY INSIGHT

With extensive experience in the US and European Lifesciences and medical devices sectors, we understand the unique challenges and opportunities you face. Our solutions are designed to align with local regulations and market dynamics.

IT & AI CAPABILITIES FOR 2030s

2S enables **next-gen IT and data landscapes** using enterprise ERP, CRM, Budgeting packages with enterprise data platforms, agentic finance workflow models, data governance and visualization tools.

VALUE IMPACT

Using technology experts from **Europe + America** with lean **Human+ Digital** competency performance units across (CPUs), we reduce time to results and costs, while improving outcomes. We turn finance into a **strategic internal AI and data partner**

SWISS AI POWER

Numantra drives continuous improvements, using AI-ML and agentic AI models to optimize operations and foster adaptability, evolved data and AI governance, resulting in sustained business excellence.

HCare360 – Proprietary Data Platform

Access Control	• In-built module for user and access management • MFA enabled • Data-level granular access management
Storage	• Cloud-of-choice hosting • Easy to setup very large data lakes • Integration with image annotation engine
Ingestion Tools	• Plug-n-play data integration across EHR, injectors • Preconfigured and customizable • Open architecture for external integration
Data Management	• Real time as well as periodic updates • Master data management • Archiving as per IT policies
Data Quality	• ML-based data quality engine • Automatic triggers for data quality • Easy incorporation of business rules

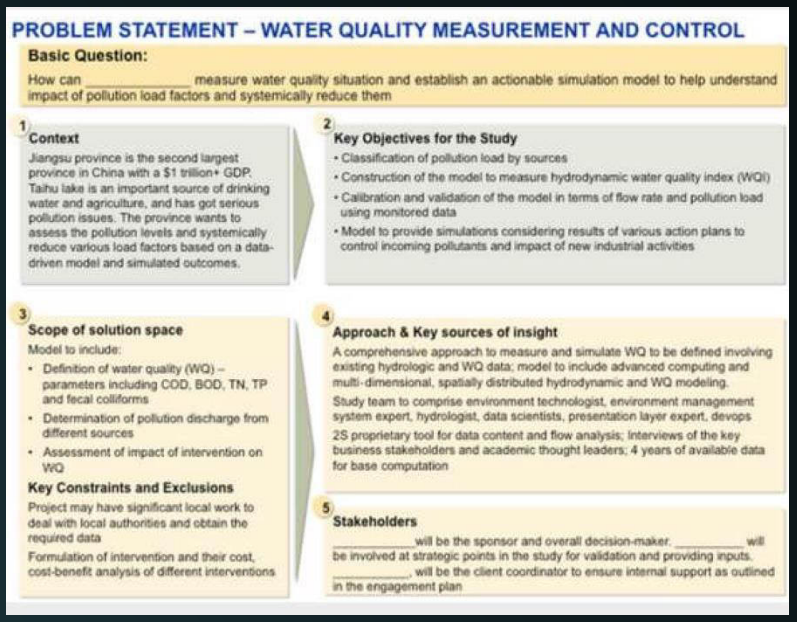

Data Security	• Privacy protection; GDPR / HIPPA compliance • Encryption at rest and in transit • Data annonymization algorithms • Customizable password policy
Workflow Mgt	• Built in micro services for custom workflows • Intuitive flows and transitions • Sophisticated calculation engine
Reporting Tools	• Powerful reporting and analytics engine • Easy integration with OLAP of choice • Business user driven
AI-ML	• Auto integration of AI-ML components • High scalability • Interactive visualization with simulations
Others	• Powerful search and collaborate features • Scalable and agile architecture • Modular design

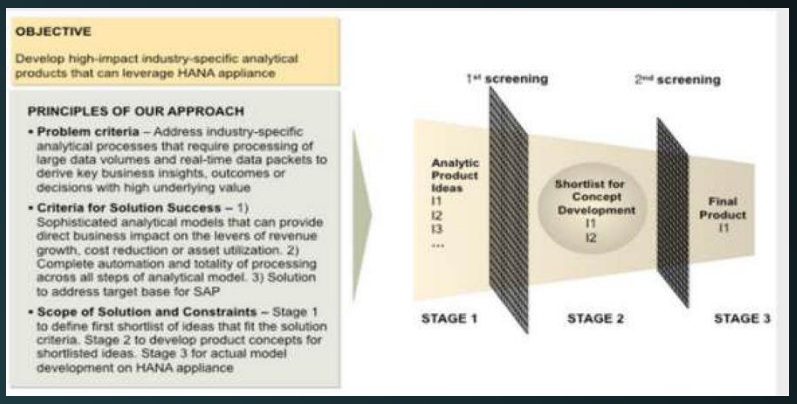

HCare360 based custom digital apps portfolio

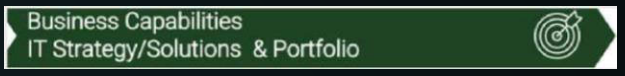

Targeted Toolkit to build a digital revenue portfolio and supporting operational and technology capabilities roadmaps

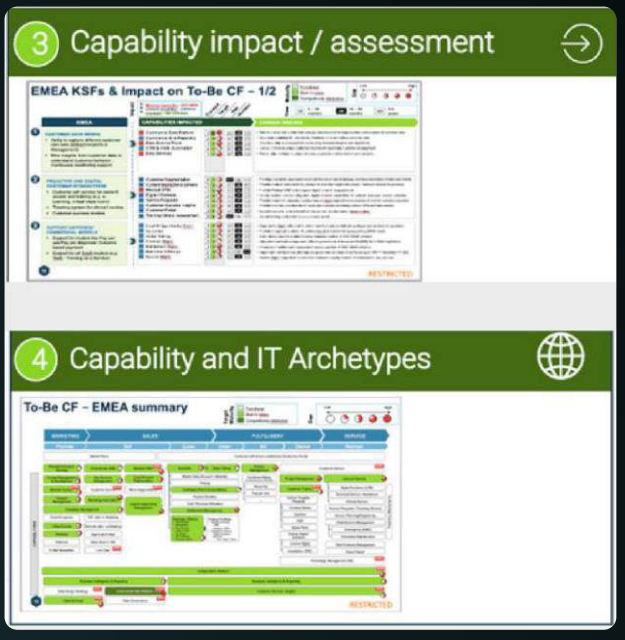

STRATEGY

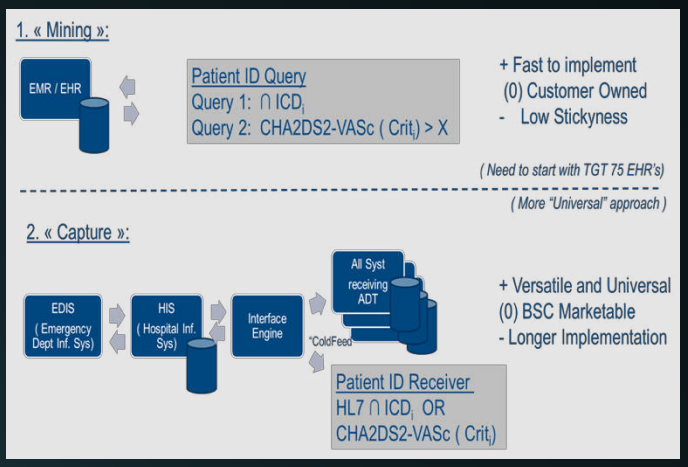

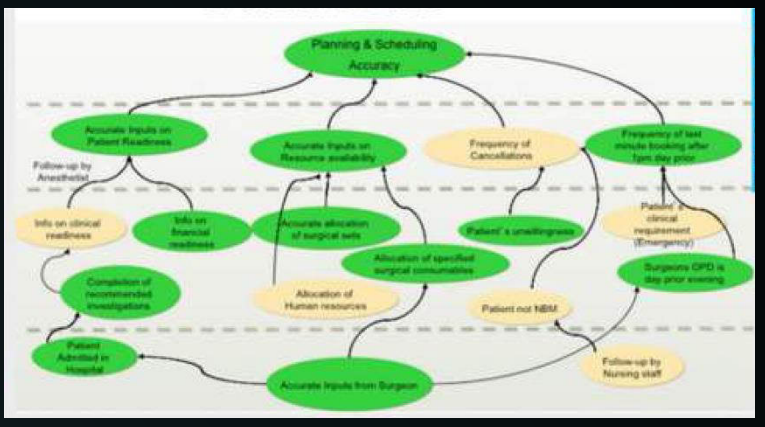

Proven Accelerators for compliant and scalable analytics/ML capabilities for healthcare and life sciences value chain

TECHNOLOGY

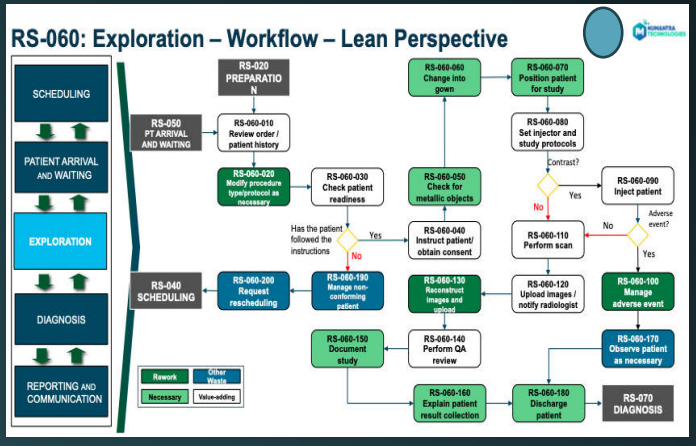

Patient identification

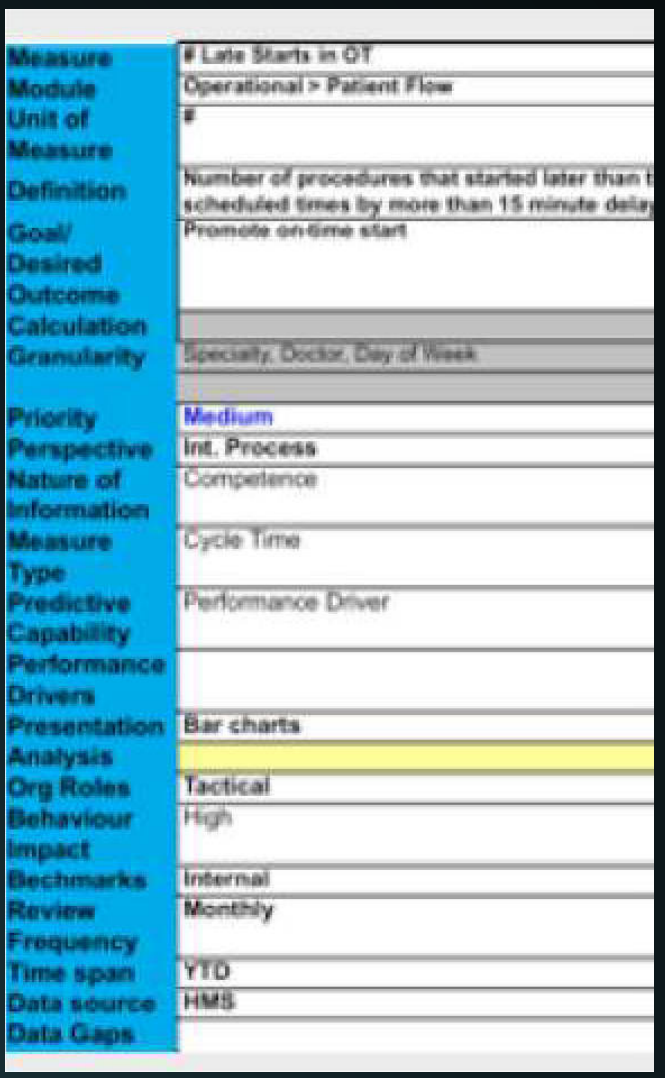

Care models

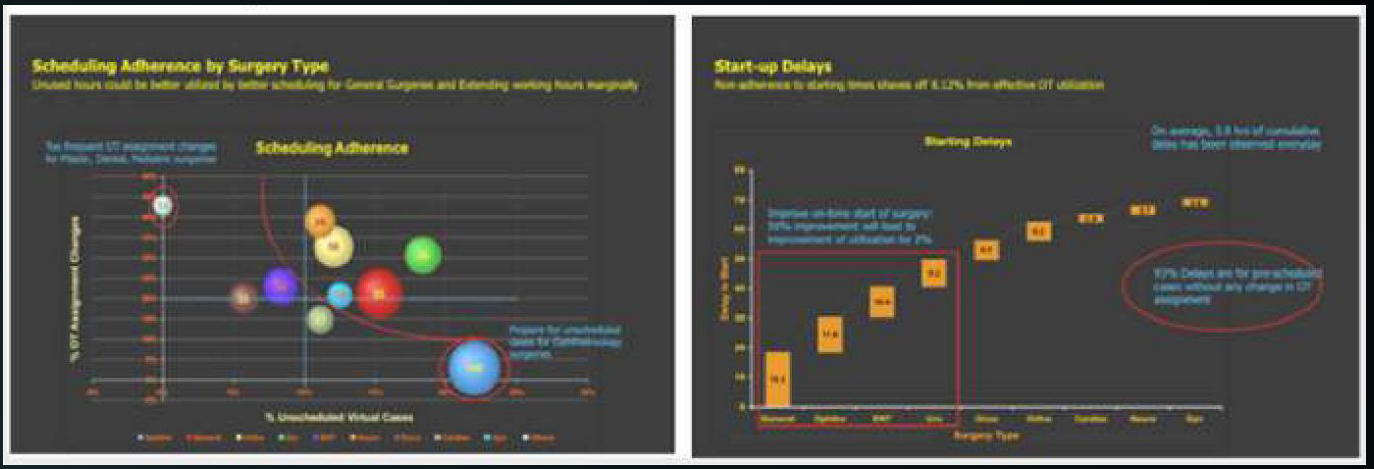

Cash flow monitor

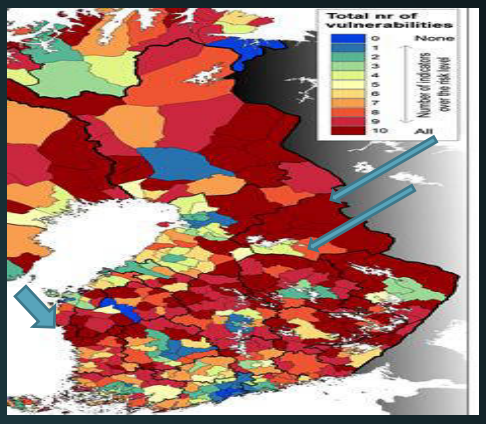

Workflow optimizers

TECHNOLOGY

OR Scans/ optimizers

Population Health

Clinical Knowledge Graphs

Public Data

- FDA / EMA etc
- SEC databases
- Patents
- Publications
- Press Releases
- Analyst Calls
- Conferences

Private Data

- Batch records
- EHR / EMR
- Research reports

Proprietary Compression Search Algorithm - accuracy & speed

AI based extraction built on ontology & workflow maps. No context size limits

A Relational Knowledge-base

Embodying business relationships, domain ontologies & scientific methodologies; embedded with source and properties of the data

Scalable Intelligence

AI with embedded ontology allows models to self-drive analysis trained on industry standards; a dependable research assistant

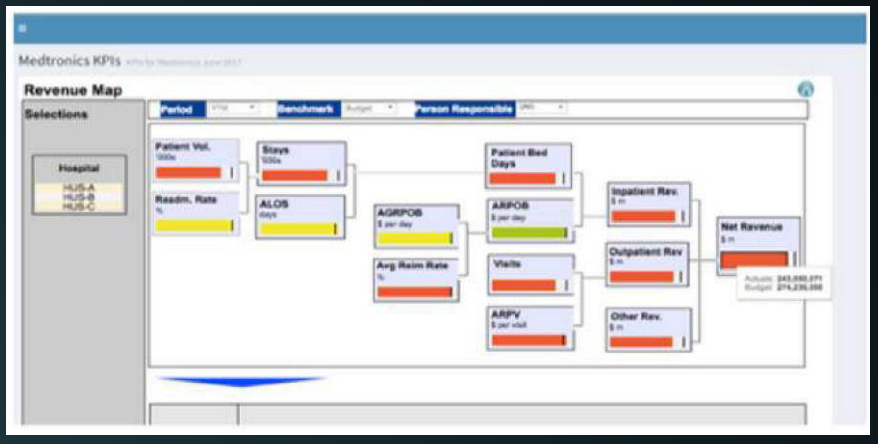

Tested and Trusted

Applied to >140 diseases, >200 entities in each disease and scaleable; presenting fact-based responses and analysis; accuracy audits at roll-out with automated testing & verification

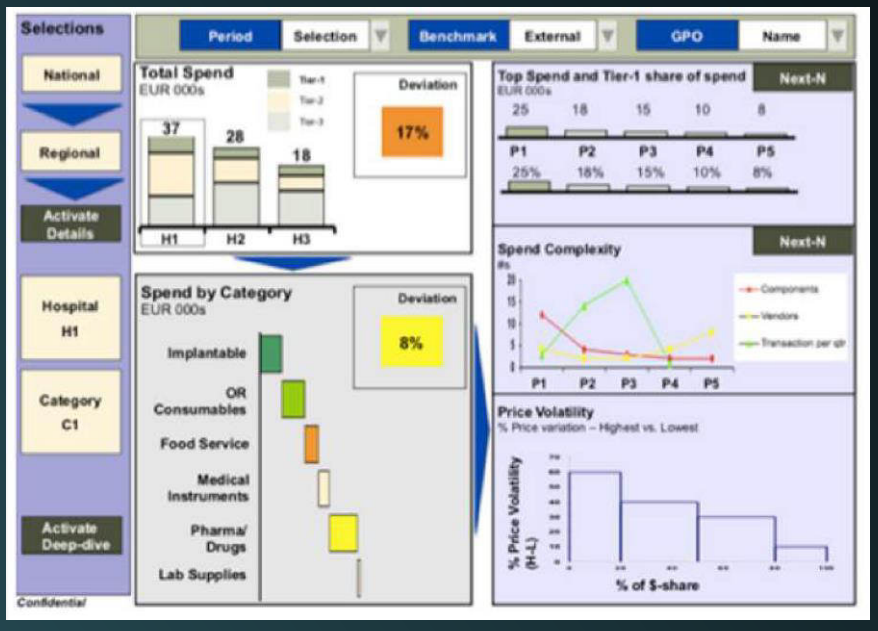

Technology-healthcare analytical toolbox

Pay per use models

Health economics calculators

Spend Monitors

We have worked with some of the leading pharma, medical devices and healthcare companies

CLIENTWORK ACROSS EUROPE / AMERICAS / APAC

EXPERTISE ACROSS AI SPECTRUM

Data solutions	Machine learning	Deep learning	Cloud
Big data	Predictive analytics	Computer vision	Infrastructure modernization (Foundation, Managed services, DevOps automation, Cloud security and Networking)
Platform engineering	Recommendation engine	Natural language processing	
Business intelligence	Forecasting	Conversational AI	
Marketing analytics		Speech recognition	

ALIGNED FOR SUCCESS

Revenue Increment

- New revenues from digital assets or leveraging data assets
- Retain/grow key customers using AI
- Optimal price realization

Cost and Asset Efficiency Improvement

- Future-ready operating models with distinctive capabilities embedded through proprietary data platforms + AI tools
- **Embed productivity and automation/AI-agent applications across R2R for reduced cycle times and costs, while creating higher impact**
- Proactive cash and asset efficiency optimization

Shareholder Expectations

- Improve managerial effectiveness (e.g. AI-led strategy execution monitoring and faster feedback loops)
- Improve execution capabilities (e.g. Ability to identify and execute AI use cases with a value impact)

HOW TO CONTACT US

If you are interested in creating a partnership with us, you can connect with us via these contact details:

Bahnhofstrasse 10, Zurich 8001
20600 Chagrin Blvd #701, OH USA
